Apeks Buyer's Guide 2027

NEW FOR 2027

VX2 PC+

Anti Fog

Lightweight and extremely durable, the VX2 mask withstands the demanding conditions of the dive environment. With superb fit and comfort, the VX2 mask moulds to the face and reduces leakage. Exceptional optical performance with no distortion delivers improved visibility and superb clarity. Featuring Apeks' new Pure Clear+ anti-fog glass technology for the first time, the VX2 provides longer-lasting fog resistance and consistently clear vision throughout the dive.

PN	DESCRIPTION	UVP
721003 BK ORUC	MASK VX2 PC+	179 €

FEATURES

- Extremely durable, strong and lightweight mask with stainless-steel outer frame and carbon fibre-filled inner frame.
- Increased field of vision of 13% compared to Apeks VX1 mask.
- Superb fit and comfort through a combination of matt and gloss areas on the silicone skirt.
- Users can swap out Pure Clear lenses quickly and easily.
- Easily adjustable, even when wearing dry gloves, through quick release buckles.
- Supplied with an additional neoprene mask strap for a secure and comfortable fit.
- Premium zipped EVA reusable protective case and plastic-free packaging.
- Antifog glass (Pure Clear+) for clear vision.
- Instant activation: just wet the lenses and rub to activate anti-fog properties immediately

PURE CLEAR+ (PC+)
PC+ technology is an advanced anti-fog lens treatment integrated directly into the glass to reduce condensation buildup.

VX1

The VX1 is the ultimate in diving mask comfort. Lightweight, frameless and with a Pure Clear lens for maximum optical clarity. The VX1 - Clearly Apeks.

RK3

The award-winning RK3 fin is renowned for outstanding performance and reliability and has fast become a firm favourite with divers. Now available in a range of new colours, the RK3 is a rugged thermoplastic rubber fin featuring an over-sized foot pocket to accommodate drysuit boots and a spring strap for easy donning and doffing. The RK3 is available in four sizes: Small, Medium, Large and Super.

We didn't give the RK3 fin a shoe-size range as this can be very misleading.

The environment that an RK3 is used in will tend to dictate the size of fin that you need, for example do you dive in a warm environment wearing wetsuit boots, or are you walking across pebbled beaches and wearing a drysuit and rigid dry boots? Both forms of footwear may be a UK size 9, but will take up different amounts of space in the fin foot pocket.

FEATURES

- The design has been the standard gear issue fin for military, special ops, coast guard, and public safety divers for decades.
- Short, wide blade provides maximum forward thrust while maintaining great manoeuvrability.
- Vented blade design reduces resistance on the upstroke and enhances thrust on the downstroke.
- The vents also eliminate vortexes that can occur along the back of the blade much in the same way split fins eliminate the vortex.
- The blade material is designed to hold up to the toughest environments, temperatures, and abuse.
- Two large grommet holes designed to fit most carabiners for easy storage of the fins while accessing the dive site.
- Spring straps as standard.
- Custom-designed buckle holds spring straps in optimum position.
- Simple push-pin design allows simple replacement of springs if necessary.

Apeks Buyer's Guide 2027

RK3 HD

The RK3 HD fin is made from a Higher-Density (HD) material than the standard RK3 which makes the fin stiffer and negatively buoyant, ideal for drysuit diving. We didn't give the RK3 fin a shoe-size range as this can be very misleading.The environment that an RK3 is used in will tend to dictate the size of fin that you need, for example do you dive in a warm environment wearing wetsuit boots, or are you walking across pebbled beaches and wearing a drysuit and rigid dry boots? Both forms of footwear may be a UK size 9, but will take up different amounts of space in the fin foot pocket.

FEATURES

- The design has been the standard gear issue fin for military, special ops, coast guard, and public safety divers for decades.
- Short, wide blade provides maximum forward thrust while maintaining great manoeuvrability.
- Vented blade design reduces resistance on the upstroke and enhances thrust on the downstroke.
- The vents also eliminate vortexes that can occur along the back of the blade much in the same way split fins eliminate the vortex.
- The blade material is designed to hold up to the toughest environments, temperatures, and abuse.
- Two large grommet holes designed to fit most carabiners for easy storage of the fins while accessing the dive site.
- Spring straps as standard.
- Custom-designed buckle holds spring straps in optimum position.
- Simple push-pin design allows simple replacement of springs if necessary.

Apeks Buyer’s Guide 2027

RK4

Conserve energy with this compact, wide-blade technical fin. Providing outstanding maneuverability in confined spaces and overhead environments, the RK4 also delivers optimum performance in open spaces. Suitable for use with both wetsuits and drysuits, the RK4 fins are perfect for frog-kicking and back-finning.

FEATURES

- Modern-style technical fin that delivers the ultimate in performance.
- Provides exceptional manoeuvrability and allows small, accurate movements in confined spaces, reducing disturbance of sand and silt. Perfect for frog-kicking.
- Delivers a more energy-efficient dive with optimum performance on both the upstroke and downstroke.
- Allows quick and easy changes between settings for wetsuits and drysuits, with 2 adjustment points and stainless-steel spring straps.
- Reduces snag hazards with integrated stainless-steel buckles that are durable and tough.
- Durable and easy to recycle with one-piece rubber construction.
- Easy to put on and take off, even when wearing gloves.

FINS RANGE

▪ **Large heel pad** is easier to use when wearing thick gloves.

▪ **Adjustable spring strap** allows you to switch between wet and dry suit and customise fit.

▪ **Stainless-steel integrated buckle** is more durable and more streamlined to prevent line entanglement.

▪ **Longer and wider blade** than current RK3 for more power and efficiency.

▪ **Flexible blade tip** allows for more precision when maneuvering in confined or overhead environments.

Apeks Buyer’s Guide 2027

THERMIQ 8/7

Mask Grip · Eco Materials · Liquid Seal Seams · Quick Dry · Change Mat · Water Resist · Flexible

The ThermiQ 8/7 gives a warmer, more comfortable dive by helping maintain body temperature throughout the dive. Incredibly easy to put on and take off, struggles with changing in or out of your suit are a thing of the past. With a changing mat that doubles up as a carry-bag included, you can change in comfort, protecting both your feet and your suit.

WHAT IS GRAPHENE ?

Graphene is a one-atom-thick layer of carbon atoms arranged in a hexagonal lattice and conducts heat better than any material on earth. Graphene equalises the body temperature – transferring heat from warmer parts of the body to colder parts - without the need for a power source, which has earned it the title of "wonder material."

LOWER-IMPACT NEOPRENE
Made from limestone is kinder to the environment than traditional petroleum based neoprene.

INTERNAL SEALS
Internal wrist and ankle seals minimise water entry keeping you warmer and drier.

GRAPHENE TECHNOLOGY
Superconductor lining allows heat to transfer from warm spots to cold spots.

LIQUID SEAMS
Double stitched and sealed seams prevents water entry and increases life of wetsuit.

WATER BASED GLUE (AQUA A)
Water based lamination adhesives use less harmful chemicals and solvents.

RECYCLED LAMINATION FABRIC
Lamination fabric is made from recycled plastic bottles.

SUPER STRETCH
4 way stretch neoprene so you can move with minimal restrictions.

APEKS IS COMMITTED TO USING ENVIRONMENTALLY FRIENDLY MATERIALS AND PROCESSES WHENEVER POSSIBLE TO HELP REDUCE OUR CARBON FOOTPRINT.

LAMINATION

WATER BASED GLUE

We use water-based glue, **eliminating harmful volatile organic compounds.**

FABRICS

DOPE-DYED YARN

Dope dyeing infuses dye pigments into molten solution to produce coloured yarns **without the traditional dyeing process.** This saves tremendous amounts of water while reducing energy consumption and water pollution.

RUBBER FOAM

ECO CARBON BLACK

Carbon black, one of the key ingredients of neoprene, can now be made from scrap rubber tyres. This significantly **reduces energy consumption** and **reduces CO2 emission** by 200g per wetsuit.

NEOPRENE

LIMESTONE NEOPRENE

The main neoprene compound **uses calcium carbonate from limestone** to form chloroprene rubber chips, remains chloroprene, instead of using dirty petroleum based ingredients.

THERMIQ 5

Stay warmer for longer with even heat distribution that helps maintain body temperature. Equalises skin temperature by transferring heat from warmer parts of the body to colder parts without the need for a power source. Experience supreme comfort whilst diving with super-stretch limestone neoprene that provides ultimate flexibility both in and out of the water.

WHAT IS GRAPHENE ?

Graphene is a one-atom-thick layer of carbon atoms arranged in a hexagonal lattice and conducts heat better than any material on earth. Graphene equalises the body temperature – transferring heat from warmer parts of the body to colder parts - without the need for a power source., which has earned it the title of "wonder material."

THERMIQ HOODED VEST

Extend bottom times and stay warmer for longer with even heat distribution that helps maintain body temperature throughout the dive. Temperature is equalised between warmer parts of the body to the core and integrated hood for a more comfortable, warmer dive. The hooded vest is made from a mix of 5mm and 3mm super-stretchy limestone neoprene allowing greater flexibility in the water and ease of fitting.

WHAT IS GRAPHENE ?

Graphene is a one-atom-thick layer of carbon atoms arranged in a hexagonal lattice and conducts heat better than any material on earth. BENEFITS

- The ThermiQ Carbon Core can be worn on its own as a rash guard in warm water or as an extra layer underneath a drysuit.
- Advanced lining is made from graphene-wrapped fibres which act as a superconductor, regulating skin temperature by transferring heat from warm spots to cold spots on the body.
- Breathable fabric prevents moisture build-up when used underneath a drysuit.
- Elasticated thumb loops keep the top in place when wearing under a drysuit.
- Colour: Male: Black / Orange - Female: Black / Yukka

TECH SHORT

The Apeks Tech Shorts are a fantastic addition to your thermal protection when extra storage and increased durability is required. These tough neoprene shorts are full of features to enhance your in-water experience and give you the flexibility to carry your extra dive gear. Pair with our Carbon Core rash guard for a complete warm water dive solution.

SIZING

BENEFITS

- 3mm compressed neoprene makes the shorts comfortable and durable.
- Large, drysuit-style pocket to allow you to store items such as wetnotes, backup mask and spools.
- Integrated grip bars in the pocket flaps make them easy to open and close while wearing gloves.
- Internal bungee loops inside the pockets let you clip off all of your backup equipment.
- Pockets incorporate a zip on the flap for storing small items such as bolt snaps and spares.
- Liquid fusion seams improve integrity and durability of the seams.
- Protective rubber logo prints reduce damage caused by friction while providing grip when sitting on a RIB.
- Easily adjustable waistband with two hook-and-loop flaps and an adjustable strap with a quick-release buckle.
- Made with lower-impact neoprene

THERMIQ BOOT

The ThermiQ Dry Boot is the perfect addition to the ThermiQ Dry Suit system. A rugged go-anywhere boot designed to protect the most demanding diver in the toughest of environments.

FEATURES

- Supportive mid-height drysuit boot.
- Lace pocket behind tongue to store laces to prevent entanglement.
- Ankle support.
- High-quality Vibram® Megagrip sole.
- Rear thumb loop to help you pull the boot on.
- Rear fin keeper prevents fin straps from slipping.
- Low-profile design allowing more fin choices.
- Simple, quick, and easy lace-up system.
- Ships in plastic-free packaging.

THERMIQ BOOT 6.5

Robust and durable, these wetsuit boots protect your feet both in and out of the water. Transfers heat from warmer to colder parts of the foot, equalizing the temperature to keep your feet warmer for the duration of your dive.

BENEFITS

- Graphene fleece lining on all panels provides maximum warmth and even heat distribution without the need for a power source.
- Reduces water ingress and flushing with side zip water dam to maintain warmth.
- Provides enhanced grip and increased protection with Vibram soles.
- Fins are kept secure and in place with integrated rear fin keeper.
- Extra protection for heels and toes with bonded rubber areas.
- Super-stretchy limestone neoprene means boots are easy to put on and take off and flexible in use.
- Environmentally sensitive manufacture using recycled car tyres. Laminated with material from recycled bottles.

THERMIQ GLOVE 5

Keeps hands warmer when diving in colder environments with effective heat transfer across the gloves. Increases the skin temperature by an average of 2°C without the need for a power source. Increases dexterity underwater through greater flexibility of super-stretchy limestone neoprene.

BENEFITS

- Equalises heat across the gloves for a warmer, more comfortable dive with Graphene fleece lining.
- Improves dexterity underwater.
- Provides maximum grip and durability with 3D silicone palm print.
- Easy to put on and take off.
- Environmentally sensitive manufacture using recycled car tires. Laminated with material from recycled bottles.

THERMIQ ONE

Flexible · Graphene Lining · Heat Transfer

Our one-piece base layer, the ThermiQ One, really is the ultimate in undersuit technology. Where science blends with brilliant design, the ThermiQ One is made from cozy fleece with graphene-wrapped fibres. Graphene acts as a super-conductor, regulating skin temperature by transferring heat from warm areas of the body to cooler areas.

The ThermiQ One offers comfort and practicality to rival anything on the market today and works in perfect union with Dry suits.

FEATURES

- Advanced fleece fabric is made from graphene-wrapped fibres which act as a superconductor, regulating skin temperature by transferring heat from warm spots to cold spots on the body.
- One-piece design to allow for easier gas management inside the drysuit.
- 2-layer fleece on core area for extra warmth.
- Zipped front pockets.
- P-valve and heated vest ports.
- Thumb loops to prevent sleeves rolling when wearing a drysuit.

SIZING

- Unisex: XS, S, M, L, XL, 2XL

P-VALVE

Go with your flow and dive in comfort with the P-Valve from Apeks. Never again let your pre-dive hydration be a concern during your dry suit dive. With one of the fastest flow rates of any pee valve on the market, you can relax and enjoy the call of the wild while the Apeks P-Valve answers your call of nature.

PN	DESCRIPTION	UVP
722457	P-VALVE	199 €

FEATURES

- Machined from solid Delrin.
- Low-profile design.
- Rubber outer grip for easy operation with gloves.
- High flow rate.
- Balanced to reduce back pressure.
- Chemical-resistant tube.
- Supplied with quick-disconnect as standard.
- Kit contains rubber backing patch, stainless-steel fitting tool and instruction manual.
- Supplied in plastic-free packaging.
- Designed and manufactured in the U.K.

XL	722205 BKBKXL	HOOD HX 7/5	
2XL	722205 BKBKXXL	HOOD HX 7/5	

FEATURES

- HX 7/5 - 7mm super stretch neoprene hood with 5mm neoprene around the face area to reduce jaw fatigue.
- Internal fleece keeps you warm throughout the dive and then dries quickly afterwards.
- Glideskin face seal minimises water entry.
- Face panel left unbound for custom trimming.
- Top vent to release trapped air bubbles.
- 3D silicone mask grip securely holds your mask in place.
- Glued & blindstitched seams for long lasting integrity.

LUNA X UMBILICAL TORCH

The Luna-X is perfect for communicating underwater or for illuminating wide areas, whilst reducing backscatter in murky water. Corrosion-resistant and able to withstand harsh dive environments, the torch is both lightweight and strong. Flexible in use, the Luna-X can be attached to BCD, cylinder or rotated for use on sidemount applications.

INTELLIGENT THERMAL MANAGEMENT
Patented circuitry within the light will reduce power to the LEDs if they go beyond the optimum temperature, keeping the light as efficient as possible to maximise output and battery capacity.

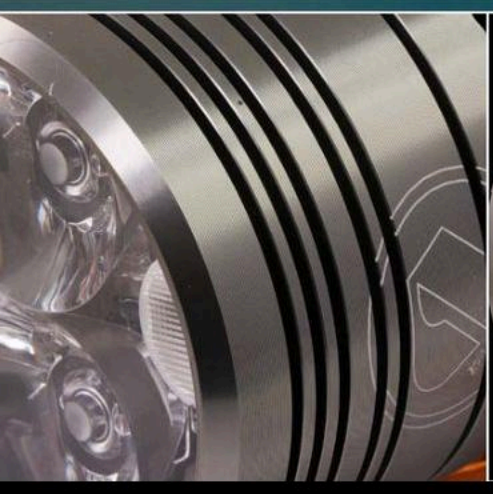

FUEL GAUGE
LED display panel for instant, real-time information on runtime remaining in hours and minutes.

SUITABLE FOR AIR TRAVEL
Battery size is under the maximum allowed by airlines - it also meets the requiremnt to be able to detach the light head for air travel.

DUAL BEAM MODES
2 different types of beam allow you to choose the best for the dive environment. Use flood mode or spot mode or both combined.

LUNA RANGE

**When slicing through the dark is your primary mission, the Apeks Luna range of torches will fill you with the reassurance you need and the intensity of light you demand.
This exclusive range of British-built torches sets a new standard in subaquatic illumination.**

LUNA MINI

Power Output | SOS Beam | Intelligent Thermal Management | USB Charge

The Luna Mini is a compact torch that packs a punch. With 1000 lumens max output, three power settings offering up to 6 hours run-time and a USB-rechargeable battery, it ticks all the boxes for both a primary and backup torch. With a marine-grade aluminium casing and available in 2 colours, this lightweight torch is perfect for life beyond diving, too.

BENEFITS

- Compact and lightweight - can be used as both a primary or back up torch.
- Choose your power settings to optimise run time: low, medium or high power.
- ITM (Intelligent Thermal Management) - Patented circuitry within the light reduces power to the LEDs if they go beyond the optimum temperature, keeping the light as efficient as possible to maximise output and battery capacity. Once the light has cooled, the power is automatically restored.
- No need to open the torch to recharge the battery, which reduces the possibility of leaks.
- Features a dedicated SOS Strobe for emergency use in or out of the water.
- Supplied in an Apeks branded reusable zippered case to protect the torch during storage and travel.
- Multi-use - ideal for camping trips or keeping in your car in case of emergencies.

FEATURES

- Factory-sealed casing machined from anodised marine-grade aluminium.
- SOS strobe setting.
- Supplied in a protective zippered case.
- Supplied with a wrist lanyard.
- Available in 2 colours - orange and grey.
- Plastic-free packaging.
- Designed and manufactured in the UK.

LUNA ADV

3600 lumen Power Output · SOS Beam · HH:MM Run Time Indicator · Intelligent Thermal Management · Programmes · USB Charge · Handle Included

Setting a new standard in dive light technology, the Luna Adv is a feature-rich torch for the explorer and adventurer. A huge 3600 max lumen and a run-time of up to 36 hours make this the dive light for those serious about going further. Featuring an industry-first digital Optimised Mode Selector, various pre-set programmes can be selected before your dive. The programmes offer a choice of run times and modes, so you can find the right one for your dive, be it a cave exploration or an intense night dive blast.

The Luna Adv is supplied with a Goodman handle for hands-free diving. Up to two torches can be mounted on the handle, or one torch and an underwater action camera. Even better, the Luna Adv is fully rechargeable via USB.

PN	DESCRIPTION	UVP

90L ROLLER BAG

When it comes to Roller bags, reliability, capacity and carrying efficiency are key. The Apeks Roller Bag collection ticks each of these boxes emphatically and allows you to carry all your gear in purposeful style. The 90L Roller is big enough to carry and protect all your equipment, with the flexibility to adjust its external envelope for your storage needs.

PN	DESCRIPTION	UVP
725001	ROLLER BAG 90L	219 €

FEATURES & BENEFITS

- 3 inner mesh zip pockets to store smaller items.
- Reduce the size of the bag based on the contents with the external compression straps.
- Easy access top pocket.
- Integrated luggage tag holder.
- Robust telescopic handle can be zipped away when not in use.
- Heavy-duty roller wheels.
- Dimensions 82 x 44 x 32 cm.
- 90 L volume is big enough to carry all of your dive kit.
- Hardwearing 500D PVC tarpaulin shell.

30L DRY RUCKSACK

Not just a dive bag, the Apeks 30L dry rucksack is your new everyday bag. A roll-top closure will keep your belongings dry, whether you are on the back of a boat or commuting home. The large dry compartment has a dedicated padded laptop sleeve and the front of the bag has an easy-to-access, water-resistant pocket. With a fully vented back and shoulder strap system, you'll always keep your cool, no sweaty shirt backs here! Durable and weatherproof, carry your gear in purposeful style, wherever you might be going.

PN	DESCRIPTION	UVP
725003	ROLL TOP DRY BAG 30L	129 €

FEATURES & BENEFITS

- 30L roll-top dry bag allows you to store all of your essentials for a dive trip or everyday use.
- Internal padded laptop sleeve.
- Easy access external water-resistant pocket.
- Vented back and shoulder strap system keeps you cool.
- Secure chest strap.
- External bungees are ideal for storing a wet towel.
- Made from a durable and weatherproof TPU fabric.

SMALL DRY BAG

Need to keep your phone handy on the boat deck? Want to keep it safe, dry AND accessible? Introducing the new Apeks mini dry bag. Stash your keys and essentials in this small but perfectly formed dry bag. Enjoy knowing that your phone is protected from damp and spray, but still fully functional thanks to the touch-sensitive casing. A roll-top closure ensures that whatever is inside stays dry and the bag can either be used with the shoulder strap or handy hip mount system.

PN	DESCRIPTION	UVP
725004	SMALL DRY BAG	24,95 €

FEATURES & BENEFITS

- Small roll-top dry bag designed to store all of your essentials when on the dive boat.
- Internal dry phone storage pouch and transparent screen allows the phone to be used whilst inside the bag.
- Over-shoulder and hip-mounting system allows you to carry the bag hands-free.
- Roll-top TPU construction is weatherproof and durable.

REGULATOR BAG

The Apeks Regulator Bag is a large padded regulator bag with enough space to hold a complete sidemount or twinset regulator configuration.

PN	DESCRIPTION	UVP
725043	REGULATOR BAG	28,95 €

DESIGNED TO
TAKE YOU TO, AND

LIFELINE ASCEND

Strong Line · High Visibility Line · 30M Line · 60M Line · Super Grip Handle · Left and Right Handed

A reel like no other, the Apeks Lifeline Ascend takes the humble SMB reel to the next level of quality and functionality. Designed and built in the UK, the Lifeline Ascend exemplifies what Apeks has become renowned for, giving the diver the finest equipment to take on their next adventure.

Designed to make deploying your delayed surface marker buoy a breeze, the 30 and 60 metre Apeks Lifeline Ascend is the finest reel on the market. And it doesn't just look good, it plays good. Designed to be used both left and right-handed, the Lifeline Ascend is simple and smooth to operate, even if you're wearing thick gloves. From the easy-grip rubber handle to the secure stainless-steel attachment points, the Lifeline Ascend sets a new standard in dive reels.

Apeks Buyer’s Guide 2027

LIFELINE HALO

The Halo spool is the latest addition to the Apeks Lifeline Spool family and is a true innovation in the diving market. With 30m of line, the large diameter of the Halo fits perfectly in the hand and allows simple, controlled deployment of the SMB, and rapid line retrieval, even when wearing thick gloves.

FEATURES

- High-quality, high-visibility line.
- Rugged construction.
- Line swivel to prevent line entanglement and twisting when deploying an SMB.
- Machined from one piece of aircraft-grade aluminium.
- Anodised coating.
- Spool is not over-wound, enabling additional line to be added if required.
- Includes stainless-steel bolt snap.
- Designed and manufactured in the UK.
- Line is sewn instead of tied to increase strength.
- Orange line, best for low-light conditions.
- Easy-release pull tabs.

Size	PN	DESCRIPTION	UVP
30M	725039 ORBO30	LIFELINE HALO	149 €

LIFELINE SPOOLS

Much copied but never bettered, we have built on the phenomenal success of the original Apeks Lifeline Spool with an updated model for 2022. With improved ergonomics and functionality, and a reduced weight, the 2022 Lifeline spool is leading the way once more. Inspired by technical diving and versatile enough to be used in a range of diving applications, the LifeLine spool features easy-to-grip, flared sides and a new rubber outer grip to improve deployment and winding. Made from tough anodised aluminium alloy with high-visibility line for low-light conditions and with a super tough leader and swivel as standard, the Lifeline comes in four sizes and colours and is complemented by a range of line markers and cookies.

FEATURES

- Unique flared design to allow ease of winding whilst wearing gloves
- Rubber outer grip makes the spools easier to hold while wearing gloves.
- Large, shaped, centre hole allows for easy deployment when wearing wet or dry gloves.
- Colour-coded to allow ease of identification of each size.
- High-quality, high-visibility line.
- Rugged construction.
- High-tensile line leader to avoid damage to main line when 'tying off'.
- Line swivel to prevent line entanglement and twisting.
- Machined from one piece of aircraft-grade aluminium.
- Anodised coating.
- Spool is not over-wound, enabling additional line to be added if required.
- Includes stainless-steel bolt snap.
- Designed and manufactured in the UK.
- Line is sewn instead of tied to increase strength.
- Orange line, best for low-light conditions.
- Easy-release pull tabs.

APEKS SMB

Make sure you're seen first time, every time, with the Apeks Surface Marker Buoy. Easily the most feature-rich SMB on the market today, a unique fully closed system oral inflator allows the buoy to be fully inflated on a single breath, meaning fast deployment in any situation. Both sides of the SMB have high-quality SOLAS reflective tape panels to ensure maximum visibility.
Not only is the Apeks SMB the perfect surface marker buoy, it can also be used as an emergency float. Brass eyelets at the ends of the float allow the diver to fold the unit and secure it into a floating loop using bolt snaps.

PN	DESCRIPTION	UVP
725006 ORBK	DSMB ORANGE 1.4 M	99,95 €

FEATURES

- Unique oral inflation valve allows for easy one-handed operation in cold water.
- 2" stainless-steel D-ring allows for easy attachment to your reel or spool.
- 2 x brass eyelets at the top of the SMB allow you to attach a torch, strobe or slate, they also enable the SMB to be folded and used as an emergency float. The eyelets can also be used to attached your SMB to the Apeks Lifeline Ascend Reel.
- SOLAS reflective tape on both sides ensures maximum visibility in rough seas and darkness.
- Simple bungee closure system with enlarged rubber pull tab allows for easy stowage and deployment even when wearing gloves.
- 1.4m single-breath, oral-inflate SMB.
- Fully taped and heat-sealed edges ensure the SMB is extremely durable.
- Reflective logo print.
- Over-pressure relief valve with pull-toggle ensures ease of use even when wearing gloves.
- Available in orange and yellow.
- Supplied in plastic-free packaging.

LINE MARKER

Line markers including directional arrows, non-directional markers and cookie markers. Available in packs of 5 in white or orange, each marker comes with an optional reflective sticker that can be added by the diver.
