AQUALUNG

## Our STORY

Now available in more than 100 countries around the world, Aqualung pioneered the creation of modern diving equipment when **Captain Jacques-Yves Cousteau** teamed with engineer **Emile GAGNAN** in 1943 to develop the first "aqua-lung," making **underwater exploration possible.** Aqualung is committed to providing sustainable, innovative, reliable, and easy-to-use products that allow adventure seekers to enjoy responsible water exploration and continues to set the industry standard for water sports equipment in technology, comfort, safety and design.

## Our WORLD

At Aqualung we believe that **underwater exploration** is an **unexpected journey** from which you can't come back unchanged. A journey where the unbelievable becomes believable, where emotions and sensations are multiplied. An unexpected journey that enriches each of us. That is why we keep on questioning the status quo, daring to think differently so we can offer every explorer the safest and most advanced water gear for their quest. At Aqualung we provide the most advanced water gear enabling anyone to reconnect with oceans and go **beyond the expected.**

BEYOND
THE
EXPECTED.
Depth 3 m I NOVEMBER 2023
BAJA CALIFORNIA
"This photograph was captured in Baja California Sur, Mexico, during the unforgettable Mexican Sardine Run. A moment I shared with great friends and one of the most incredible ocean experiences of my life. Beyond winning the title of Ocean Photographer of the Year 2024, this image represents the emotions, adventure and connection that make every ocean encounter unforgettable."

Aqualung Buyer’s Guide 2027

# Our Regulator Technologies.

## 1st Stage

**AUTO CLOSURE DEVICE**
The ACD keeps the inlet shut to protect internal parts from debris and corrosive water when not connected to a cylinder valve. It helps to maintain oxygen compatibility, preserve internal lubrication, and keep the inlet filter clean and dry. This extends the life of the first stage between services.

**DE-ICE**
Deep ribs create a large heat exchange surface area, helping to prevent ice from forming on the mechanism. The overmolded cap delays ice formation over the external diaphragm.

**PERMANENT DRY CHAMBER**
Where there's no moisture, there's no ice. The Permanent Dry Chamber keeps internal parts clean and dry by isolating them from the outside environment. This enhances overall freeze resistance of the regulator when diving in cold water.

**OVER BALANCED MECHANISM**
Also known as Auto-Balanced, the Over-Balanced Mechanism overcompensates the interstage pressure to reduce your breathing effort. Regardless of depth or tank pressure, it provides effortless breathing from the beginning to the end of your dive.

**DUST CAP PROTECTION**
Attached to the regulator body, the Dust Cap protects the inlet fitting and the Auto Closure Device from impacts and damage. It also seals the 1st stage when it's off the tank.

**BLUE HIGH PRESSURE SEAT**
It is the core of the 1st stage. The Blue High Pressure Seat opens and closes with every breath, forming a perfect seal with durable materials that work in all conditions and with all gasses. The working pressure of the 1st stage is automatically elevated to counteract the increased breathing air density.

## 2nd Stage

**COVER OPENING CHANNELS**
The Front Cover Opening Channels allow water to flow sideways over the diaphragm. The wide radial openings prevent freeflows when diving in strong currents and reduces cracking effort by 20%.

**MASTER BREATHING SYSTEM**
Integrated control of the Venturi effect and inhalation effort means one adjustment completes both tasks simultaneously.

**INTERCHANGEABLE MOUTH PIECE**
The detachable and reusable mouthpiece clamp allows for quick and simple tool-free change, avoiding plastic waste.

**COMFO-BITE**
A patented and comfortable mouthpiece featuring a unique palate bridge reduces jaw fatigue and securely holds the 2nd stage in place. Made from hypoallergenic silicone, the orthodontic mouthpiece is both soft and sturdy.

**AIR CHANNEL DEFLECTOR**
Streamlined bi-material component directs the air flow evenly through the 2nd stage and lowers exhalation effort.

easy Easy Adjust · Made in France · Cold/Warm Water

# Leg3nd Elite

The **Leg3nd Elite** has been crafted for diving in challenging and extreme environments. This high-performance regulator offers exceptional breathing comfort and superior performance in any dive condition.

Advanced divers will appreciate its independent micro-adjustments of the breathing resistance, which allow them to fine-tune it to their individual breathing requirements. This aesthetic masterpiece made with stainless-steel parts offers intuitive ergonomics right at your fingertips.

All depths, all conditions, all dives.

Designed and made in France.

# Leg3nd / Leg3nd Partner

When performance is your highest priority, Leg3nd is the answer.
The **Leg3nd** shares the same breathing characteristics with the Leg3nd Elite and Leg3nd MBS.
The familiar Venturi switch now features an updated and ergonomic design. Overmolded with "soft touch" elastomer, the ergonomically designed switch perfectly controls the Venturi effect, either allowing or containing a natural freeflow.

UVP inkl. MwSt. · Stand 22.09.2026

Decades of design innovations and technological advancements mean Aqualung has perfected the buoyancy compensator, exceeding the needs and expectations for all levels of divers.

We've dialed in buoyancy control with our exclusive i3+ inflation/deflation mechanism.

We've created customization options galore with our unique ModLock system. And as the world transforms, we will continue to revolutionize jacket, back-inflated, and hybrid styles of BCDs.

# BCD's®

## BCDs

UVP inkl. MwSt. · Stand 22.09.2026

Aqualung Buyer's Guide 2027

# Our BCD Technologies.

***WRAPTURE HARNESS***
An ultra-thin inner harness that fixes the BCD snug to the body to prevent riding up in the water while also distributing weight evenly by holding the tank closer to your center of gravity so you can stand and walk upright with ease.

***SWIVELING BUCKLES***
As you adjust the webbing, the buckle turns automatically to follow the fit of your torso.

***SURE LOCK II***
Snap in the integrated SureLock II Weight Release System pockets with an audible "click" and quickly remove them with one smooth pull.

***MODLOCK***
This unique connector system creates easily interchangeable size and accessory configuration for a personalized dive.

***GRIP LOCK TANK BAND***
Tanks stay upright and secure with the GripLock Tank Band featuring a finger-saving metal buckle that will never pinch and micro adjustment options for the strap to help you quickly adjust for different sized cylinders.

***BLADDER RETRACTION SYSTEM***
Stretch webbing pulls in BCD bladder sides when deflated to eliminate drag and help streamline your profile, reducing your effort and lowering air consumption.

***i3+***
Exclusive to Aqualung, divers can adjust buoyancy with a simple side lever. Pulling up inflates in small or large bursts, and pushing down opens all the exhaust valves to vent without adjusting body position.

## ***MODLOCK*** System

Aqualung's patent-pending **Modlock** connectors revolutionize the way we look at BCDs. Thanks to a round clipping design and 27 size configurations, the Modlock allows you to fully customize your BC for the perfect fit and needed accessories.
Beyond picking our base components such as the back pad, the waistbands, and the shoulder straps available in 3 sizes, you can add a range of optional accessories such as different sized trim pockets or an SMB holder.
Unlock each component in a matter of seconds to reduce volume for transportation or adapt your configuration before going diving.
You won't need a special tool to do it, a simple pen or key works.

# Axiom i3+ Men

Easy Access Pocket · Comfort

Power. Performance. Peace of mind. That's the **Axiom i3+** Men's BCD.
The incorporated exclusive i3+ inflation/deflation system means perfecting your buoyancy has never been so easy. Our innovative jacket-style BCD has an inner Wrapture harness that holds you tight and keeps you upright by distributing tank weight. Focus on the important part of diving—enjoying it—with the **Axiom i3+**.

### Technical Features

***WRAPTURE HARNESS***
An ultra-thin inner harness that fixes the BCD snug to the body to prevent riding up in the water while also distributing weight evenly by holding the tank closer to your center of gravity so you can stand and walk upright with ease.

***i3+***
Exclusive to Aqualung, divers can adjust buoyancy with a simple side lever. Pulling up inflates in small or large bursts, and pushing down opens all the exhaust valves to vent without adjusting body position.

***SURE LOCK II***
Snap in the integrated SureLock II Weight Release System pockets with an audible "click" and quickly remove them with one smooth pull.

***SWIVELING BUCKLES***
As you adjust the webbing, the buckle turns automatically to follow the fit of your torso.

***GRIP LOCK TANK BAND***

***BLADDER RETRACTIONSYSTEM***

# Axiom i3+ Women

Easy Access Pocket · Comfort

Simply the best women's BCD out there. The **Axiom i3+** for women offers our exclusive incorporated i3+ inflation/deflation system for perfecting buoyancy control. Our innovative jacket-style BCD has an inner Wrapture harness that holds you tight and keeps you upright by distributing tank weight.
The women's cut has a shortened design with scalloped sides in order to take pressure off the hips and fits the shorter torsos of females. Experience the ultimate BCD for women's diving.

# Rogue

Travel Fonction

Created for the accomplished diver who knows exactly what gear they want, the **Rogue** BCD strikes the perfect combination of personalization and minimal design. Utilizing Aqualung's innovative ModLock connectors, the Rogue allows divers to dive their way thanks to the easily interchangeable size and accessory configurations. This back-inflation BCD ensures your comfort and freedom underwater, allowing you to create your perfect fit with interchangeable back, waist, and shoulder pieces. When it comes to your gear, make every dive personal. Your Dive. Your Way.

### Technical Features

***SURE LOCK II***
**Snap in the integrated SureLock II Weight Release System pockets with an audible "click" and quickly remove them with one smooth pull.**

- Configurable: Some divers may prefer to run their instruments behind the left pocket and out the scooped opening on top, in front of the lobe.
- Gear Up! Multiple pockets, D-rings, and knife attachment points make stowing and accessing gear easy.
- Easy-to-carry backpack handle: proprietary backpack has built-in handle.

# Pro HD Women

Easy Access Pocket

Strong. Sleek. Secure. The **Pro HD Women** is a wrap-around, jacket-style BCD designed to fit the female diver. With its adjustable waistband and specially curved shoulder straps, you can customize it for a perfect fit. Plus, its lower profile lobes and shorter torso length help it rest comfortably on the hips.

| | XS | SM | MD | ML | UVP |
|---|---|---|---|---|---|

### Technical Features

***SURE LOCK II***
**Snap in the integrated SureLock II Weight Release System pockets with an audible "click" and quickly remove them with one smooth pull.**

- **HYBRID JACKET ADV-STYLE** jacket combined with back inflation unit gives you the best of both worlds: a streamlined profile during your dive and the ability to float comfortably at the surface.
- **OCTO POCKETS**

  Two octo-pocket locations for versatility: right lobe and top of front lobe.
- Gear Up! Multiple pockets, D-rings, and knife attachment points make stowing and accessing gear easy.

# Pro HD Compact

Easy Access Pocket · Travel

Tired of paying excess baggage fees? This ultra-light, weight-integrated, back-inflation BCD is everything you need without extra weight or bulk. Lift it and feel for yourself that even a ML/LG weighs less than 4.75lb/2.2kg with airway and weight pockets included! Can be packed flat or rolled. The perfect BCD for travel.

## Technical Features

***SURE LOCK II***
**Snap in the integrated SureLock II Weight Release System pockets with an audible "click" and quickly remove them with one smooth pull.**

- Innovative tank support system eliminates the need for a hard pack.
- A valve strap pulls the top of the cylinder in towards the center of gravity, transferring the load to the hips and relieving the shoulders.
- Great packability – flat or rolled.

The figures in this guide are approximate, just to give an idea, not absolute

**MEASURING POINTS FOR WAIST SIZE**
Men are measured at waistline, rather than normal beltline

**MEASURING POINTS FOR OTS LENGTH**

Dive instruments from Aqualung are “Complex Made Easy.”

From our innovative TFT and IPS screens to our simple magnetic charging connection and advanced Bluetooth 5.0, today’s divers have convenient, easy-to-use technologies and connectivity at their fingertips.

Discover a whole new world on your next adventure with the reliability and functionality of computers and instruments from Aqualung.

# Instrumente

# Our Instrument Technologies.

***BT 5.0***
Bluetooth with twice the data transfer speed (2 Mbps) for uninterrupted connection and four times the communication distance as compared to Bluetooth 4.2.

***MAGNETIC CHARGING CONNECTION***
Power your dive computer in a snap with Aqualung's magnetic charging cable.

***TFT***
TFT (thin-film transistor) technology offers smooth screen changes for an uninterrupted view of your data along with increased energy efficiency when compared to a regular LCD display.

***IPS***
IPS ("In-Plane Switching") screens provide better visuals with richer colors and accurate viewing from all angles, even in direct sunlight.

***NATO STRAP***
This unique strap design doubles back to create a full loop. A simple buckle closure helps the computer stay centered and fastened on your wrist.

***DIVERLOG+ APP***
Staying connected and managing your dives has never been simpler! Wireless Bluetooth Smart connectivity lets you wirelessly sync your dive data with the DiverLog+ app on your mobile device (available for iOS and Android).
With your DiverLog+ app, you can remotely control all your dive computer settings, view dive log and profile data, add locations, notes and other details from your adventures. After your dive, share your memories, stats, photos, and dive site locations on social media.

* Our technology ensures that once set, your transmitter is permanently paired to your computer.

* To ensure accuracy and reliability in our analog collection, Aqualung goes well above the industry standard in utilizing the highest-quality Swiss-manufactured Bourdon tubes.

# THE AQUALUNG DIFFERENCE

Aqualung controls all **aspects of design**, development and manufacturing of our dive instrumentation. We do this to ensure we have high **quality products** that our divers can rely on. Because of this commitment, you will find this **Aqualung Difference** throughout our product line.

Aqualung Buyer’s Guide 2027

# Our Mask Technologies.

***ADVANCED FIT TECHNOLOGY***
Only available from Aqualung, AFT creates varying textures within the silicone so it can better conform to any face shape to improve sealing and comfort.

***PRESSURE REDUCTION ZONE***
Each mask is reinforced for stability and pressure points are reduced to maximize comfort and eliminate leaks.

***FRAMELESS TECHNOLOGY***
By eliminating the frame, the silicone is sealed directly to the lens, creating a compact and close-fitting design for optimal vision.

***CARDANIC JOINT BUCKLES***
Used to permit both vertical and horizontal rotation of the buckle, the joint will never pinch your face or pull the mask.

***QUICK RELEASE BUCKLES***
Even thick gloves won't get in the way of this one-touch adjustment system with buckles attached directly to the silicone skirt for added stability of the mask on the face.

***NEW LENS QUICK RELEASE SYSTEM***
Remove and replace lenses safely and in a quick snap with our special locking system and included tool.

***UNIVERSAL ADVANCED SILICONE SKIRT***
Our advanced technology and wrap-around geometrical shape made of crystal-clear, soft silicone provides the perfect fit for the widest variety of face shapes and sizes.

***CLEARVIEW TECHNOLOGY (CVT)***
CVT features an advanced anti-fog treatment integrated directly into the lenses to reduce condensation buildup and maintain exceptional underwater clarity throughout the dive.

# Zephyr Flex

Splashguard · Purge Valve · Comfo Bite

| | | |
|---|---|---|
| 701510 HLBK | 29,95 € |
| 701510 BLBK | |
| 701510 BKBK | |

**Technical Features**

- At the very heart of the snorkel is our shaped and protected silicone Elliptical Purge Valve: the shape of the valve guarantees sealing as well as ease of purging.
- The anatomically-designed mouthpiece made from medical silicone reduces jaw fatigue.
- The joint between the mouthpiece/valve box and the corrugate is a swiveling sealed connection that rotates for a better fit.
- The large snorkel retainer is very easy to use even with thick gloves, thanks to an ergonomically-designed structure.
- The D-barrel-shaped tube helps the Zephyr Flex rest more streamlined against the diver's face.

# Impulse Classic Flex

Purge Valve · Comfo Bite

| | | |
|---|---|---|
| 701509 BLBK | 39,95 € |
| 701509 BKBK | |

**Technical Features**

- Keeps Water Out, the Impulse has two valves: if a wave breaks over the snorkel, the upper valve directs most of the water out before it reaches the mouthpiece. But if water does get past the first valve, it will drain out through the lower valve.
- Clears Easily, in the unlikely event that you would need to clear the reservoir below the mouthpiece, all it takes is a gentle puff of breath.
- The flex section allows for easy positioning and will drop away when not in use.

# Air Dry

Splashguard · Purge Valve · Comfo Bite

| | | UVP |
|---|---|---|
| | 701511 HLCL | 29,95 € |
| | 701511 NVBK | |
| | 701511 BKCL | |

**Technical Features**

- Vent system over the tube reduces water splash-in.
- Lower reservoir with two purge valves.
- Flexothane tube is supple yet resistant.
- Comfo-bite silicone mouthpiece.

# Impulse Classic

Purge Valve · Comfo Bite

| | | |
|---|---|---|
| | 701505 BLBK | 39,95 € |
| | 701505 BKBK | |

**Technical Features**

- Keeps Water Out, the Impulse has two valves: if a wave breaks over the snorkel, the upper valve directs most of the water out before it reaches the mouthpiece. But if water does get past the first valve, it will drain out through the lower valve.
- Clears Easily, in the unlikely event that you would need to clear the reservoir below the mouthpiece, all it takes is a gentle puff of breath.
- Eliminate jaw fatigue, our patented comfo-bite mouthpiece does not necessitate clenching your teeth, reducing fatigue, even after hours of adventure. Mouthpieces are replaceable. Available in two mouth sizes.
